About Our Institution

V V college of Engineering was established in the year 2010 by our beloved Chairman Shri. S. Jegatheesan. The main aim of this institution is to provide a world class technical education to the students who hail from the marginalized sectors of the society at their rural area. Our institution is situated at 5 km distance from Tisaiyanvilai. It offers 5 undergraduate and 4 post graduate Programme in the field of Engineering. Within this short period, our college has achieved excellence through innovative activities. Being equipped with all the latest lab equipment and ICT teaching tools, our institution provides quality technical education and research exposure to the students. No doubt that V V College of Engineering stands as a premier center for the students who aspire quality technical education and research. The College has 18 doctorates in various fields; of them 7 are recognized research supervisors of Anna University, Chennai.

About Our Department

The Department of Computer Science and Engineering (CSE), since its inception in 2010, has a steady growth in every sphere of its activities. The department is offering a full time B.E., degree programme and M.E., Programme in Computer Science and Engineering. The annual intake of the department is 90. The department provides world class training and outstanding facilities to students. The department organizes guest lectures, seminars, workshops and training programmes for the benefit of students and staff. This branch of study concentrates on Networks, Database, Theoretical Computer Science, Multimedia, Image Processing, Software Engineering and Data Mining.

The department offers theoretical and practical expertise to learners. The laboratories are well installed with a variety of software that cater to the needs of the students besides the curriculum specified by the affiliated University.

Scope of the Conference

National Conference on Innovative Computing Technologies and Applications (NCICTA-23) focuses on both theory and applications in the broad areas of Innovative Computing Technologies, Internet of Things, Data Analytics and Information Security. NCICTA-23 aims to build networks among the industries and academia, detecting research demands, exchanging best practices and experience in a global scale context. It will be an active forum for Academicians, Data scientists, Statisticians, Research Scholars and Students to share and disseminate information on knowledge and scientific research works.
